

I Love the NJ "Do not call list" I was sick and tired of being harrassed by telemarketers during dinner and sleeping hours. I paid for my phone service so I can use it not so someone else can benefit from it. It's bad enough that we still have to receive from the various non-profit leagues that don't know how to take no for an answer. I have more rights to my phone than any other company that wants to use it for telemarketing!
